---

In consideration of my participation in Undergraduate Research Opportunities Program (UROP) projects or certain Beaver Works capstone courses, or in consideration of other opportunities in which I may use significant MIT funds or facilities, I am required to comply with MIT's Ownership of Intellectual Property Policies, as set forth in Article 13 of [MIT's Policies & Procedures](#) and in the [Guide to the Ownership, Distribution and Commercial Development of MIT Technology](#) (the "Technology Policy Guide").

I understand that any patentable inventions, copyrightable materials, computer software, semiconductor mask works, tangible research property, and trademarks ("Intellectual Property") created during the opportunities might be subject to federal regulations or other contractual obligations. I understand that MIT is obligated to comply with those regulations and obligations, and I agree as follows:

- A. I shall disclose and assign, and I hereby assign, to MIT all rights in the Intellectual Property conceived, invented, authored, or reduced to practice by me which:
- (i) is developed during or pursuant to a sponsored research or other agreement which is administered by MIT as described in Part 2 of the Technology Policy Guide; or
  - (ii) results from the significant use of MIT administered funds or MIT facilities as defined in Paragraph 2.1.2. in the Technology Policy Guide; or
- B. I will execute all necessary papers and otherwise provide proper assistance, promptly upon MIT's request and at MIT's expense, during and subsequent to the period of my MIT affiliation, to enable MIT to obtain, maintain, or enforce patents, copyrights or other legal protection for such Intellectual Property.
